Property Description

This new listing is a custom built barndominium with lots of great features.

Built in 2021, the tall ceilings and current styling add to the comfy feeling of this home. It has several custom features including a water softener, soft close cabinetry hardware and high quality doors with enclosed blinds. The house has great closet space and a sizable kitchen pantry. Due to the height of the side walls of the building, a second story of finished living space could be added to the residence. On the exterior, there is a covered patio, a tall wooden fence with a concrete footer, and a sprinkler system for the lawn.

16 ' side walls on the building along with a 14' overhead door allow for easy RV storage. The 8' overhead door accommodates smaller vehicles. The 2000 square foot shop area measures 40' wide by 50' deep. It is foam insulated and has great LED lighting.

Give Coby a call to schedule your showing.
